

TĀKINA EVENTS

AUDIO-VISUAL SYSTEMS AT TE PAPA

TĀKINA EVENTS

AUDIO-VISUAL EVENT SERVICES

Tākina Events boasts an experienced and professional audio-visual event services department, which can facilitate a range of exclusive technical production resources and provide support services throughout your eventing journey.

The designated event spaces at Te Papa feature permanently installed, user-friendly, and intuitive audio-visual systems, allowing for ease of use, quality, and reliability, without the significant labour resource associated with installing, testing, and removing, on a per-event basis.

This includes networked and integrated AV systems, including laser projectors, motorised projection screens, audio reinforcement (PAs), and microphones. This equipment is included within the venue rental hire agreement, therefore is commonly referred to as 'Standard AV Inclusions'.

The following table on Page 3 provides an overview of the available standard AV Inclusions that Tākina Events has to offer. A more comprehensive breakdown of the included equipment and services is provided on pages 2 - 17 of this document.

Recommended presentation lighting and staging are available to book on your event at an additional cost - noted within the following table.

Hybrid and virtual technology solutions are available, along with additional options to enhance your event experience, and our friendly team of AV Coordinators will be happy to discuss these with you.

Unless provided by an approved AV supplier, if you intend to use your own equipment on the day, all equipment will require approval from Tākina Events. Approval is required at least 14 days prior to the event and may be subject to an inspection to ensure the equipment adheres to Tākina Events brand expectations and health and safety requirements.

For any queries, please do not hesitate to contact the Audio-Visual Event Services Team - AVECTeam@tepapa.govt.nz

For more information on Te Papa Museum of New Zealand and access to general event planning guides, please check out the [Tākina Events - Website](#) online, and the available [Tākina Events - Toolkit](#)
